HISTORY

Meets Specifications

Analysis

- The SQL query used to extract the data is included.
- The query runs without error and pulls the intended data.

Moving averages are calculated to be used in the line chart.

Good job adding the method you used to calculate your moving average! It enables your reader to understand the method you used, and reproduce it if need be. Being able to reproduce a report or a study is important in the scientific method.

- A line chart is included in the submission.
- The chart and its axes have titles, and there's a clear legend (if applicable).

- The student includes four observations about their provided data visualization.
- The four observations are accurate.
